

COINMONIE DATA DELETION POLICY

Policy and Technical Protocols Governing Data Retention, Erasure, and Processing Limits

- **Status:** Final Published Version
- **Effective Date:** August 14, 2026
- **Data Protection Officer Contact:** privacy@coinmonie.com
- **Compliance & Escalations:** compliance@coinmonie.com

1. Purpose and Scope

This Data Deletion Policy (the "Policy") establishes the framework by which Moniemax Digital Technology Solutions Limited dba Coinmonie ("Coinmonie", "we", "us", "our") processes customer data erasure requests, isolates mandatory compliance records, and disposes of personal and corporate data.

This Policy applies to all registered individual users (KYC), corporate entity representatives and beneficial owners (KYB), API client users, and platform visitors across all applications, interfaces, and settlement services operated by Moniemax Digital Technology Solutions Limited dba Coinmonie.

2. Statutory Context: Erasure Rights vs. Legal Retention

Under the **Nigeria Data Protection Act (NDPA) 2023**, data subjects possess the right to request the deletion of their personal data. However, as a regulated provider of stablecoin conversion, payment, and settlement API infrastructure, Moniemax Digital Technology Solutions Limited dba Coinmonie is legally mandated by the Central Bank of Nigeria (CBN), the Securities and Exchange Commission (SEC), and the Money Laundering (Prevention and Prohibition) Act 2022 to maintain audit trails of financial transactions and verification records.

When a user submits a data deletion request, non-essential data is permanently deleted within the statutory timeframe, while mandatory legal and financial records are securely archived for the required statutory retention period before final destruction.

3. Data Categorization and Erasure Schedules

Data Category	Data Elements Included	Erasure Action	Statutory Retention Period	Primary Lawful Basis

Non-Essential Personal Data	App preferences, notification settings, marketing consents, browser cookies, non-regulatory telemetry, and operational logs.	Permanently Deleted upon validated request.	Erased within 30 calendar days of request verification.	Consent / User Request under NDPA 2023.
Individual Verification (KYC)	Government IDs, live selfie/liveness data, residential proof, phone numbers, and occupation details.	Archived & Restricted; deleted after retention expiry.	Retained for 5 years post-account closure.	CBN & SEC AML/CFT/CPF Regulations.
Corporate Verification (KYB)	Incorporation certificates, director records, register of UBOs, corporate tax IDs, and authorized signer identities.	Archived & Restricted; deleted after retention expiry.	Retained for 5 years post-account closure.	Money Laundering (Prevention and Prohibition) Act 2022.
Financial & Transaction Data	Bank account numbers, payout details, wallet transaction hashes, quotes, fees, settlement logs, and invoice copies.	Archived & Restricted; deleted after retention expiry.	Retained for 5 years post-transaction or relationship end.	NFIU & Financial Recordkeeping Directives.

Legal & Dispute Records	Chargeback records, active investigation logs, court orders, fraud alerts, and formal complaints.	Archived & Restricted; deleted after legal hold release.	Retained until expiration of legal limitation periods.	NDPA 2023 Statutory Legal Claims Exception.

4. How to Submit a Data Deletion Request

Users may submit an official Data Deletion Request through any of the following channels:

- **In-App Account Deletion:** Navigate to [Account Settings](#) > [Security & Privacy](#) > [Request Account & Data Deletion](#) within the Coinmonie dashboard or mobile application.
- **Email Request:** Submit a written request from your registered email address to privacy@coinmonie.com.

Request Details Required:

1. Account Type (Individual KYC or Business Entity KYB);
2. Full Legal Name / Registered Entity Name;
3. Registered Email Address and Associated Phone Number; and
4. Explicit statement: *"I request the permanent deletion of my account and personal data held by Moniemax Digital Technology Solutions Limited dba Coinmonie."*

5. Step-by-Step Request Handling Protocol

1.Identity & Authority Verification:Authenticating the requester to prevent unauthorized deletion.

Upon receiving a request, Moniemax Digital Technology Solutions Limited dba Coinmonie validates the requester's identity using multi-factor authentication (MFA) or single-use verification codes sent to the registered email address. For business accounts (KYB), authorization from a registered director or account administrator is required.

2.Data Parsing & Classification:Separating essential compliance data from deletable operational records.

Automated systems scan active databases to separate non-essential operational data (such as marketing preferences and telemetry) from mandatory financial, KYC, KYB, and transaction records.

3.Active System Purge & Third-Party Propagation:Executing erasure across active systems and service providers.

Non-essential data is permanently purged or anonymized across all active databases, API logging systems, and internal microservices. Downstream subprocessors (such as customer support software or identity verification vendors) receive automated instructions to delete cached user data.

4.Encrypted Compliance Isolation:Moving financial crime and transaction records to cold storage.

Mandatory compliance data (KYC/KYB records, payment ledgers, transaction histories) is isolated from ordinary operational software and transferred to encrypted, restricted-access storage accessible only by the MLRO and Legal Counsel.

5.Final Confirmation & Closure Notice:Notifying the user of action taken and statutory retention windows.

Coinmonie sends an email confirming account termination, detailing the categories of non-essential data permanently deleted, and specifying the statutory 5-year retention window governing mandatory compliance records.

6. Subprocessors and Third-Party API Clients

Where Moniemax Digital Technology Solutions Limited dba Coinmonie uses third-party infrastructure (such as cloud hosting, biometric verification engines, or communication gateways), Coinmonie dispatches data deletion notices requiring those vendors to erase all cached copies of non-essential data from their systems.

Where Moniemax Digital Technology Solutions Limited dba Coinmonie acts strictly as a Data Processor for an institutional API client, end-users must direct their deletion request to the primary API merchant. Coinmonie will assist the API merchant in executing the request in accordance with the underlying data processing agreement.

7. Post-Retention Expiration Data Destruction

Upon the lapse of the mandatory 5-year statutory retention floor (or the resolution of any active litigation or regulatory holds):

- Archived compliance ledgers, KYC/KYB records, and transaction data are subjected to cryptographic erasure or secure physical media sanitization.
- No residual data remains recoverable or retrievable on active production databases or backup archives.
