

COINMONIE TERMS OF SERVICE

Terms Governing Stablecoin Conversion, Payment, and Settlement API Services

- **Status:** Final Published Version
- **Effective Date:** August 14, 2026
- **Contracting Entity:** Moniemax Digital Technology Solutions Limited dba Coinmonie ("Coinmonie", "we", "us", "our")
- **Official Contact:** compliance@coinmonie.com

1. Agreement and Contracting Entity

These Terms of Service (these "Terms") constitute a legally binding agreement between you ("you", "your", or "User") and **Moniemax Digital Technology Solutions Limited dba Coinmonie**. These Terms govern your access to and use of Coinmonie's websites, web applications, dashboards, conversion tools, payment rails, and settlement APIs (collectively, the "Services").

By creating an account, connecting a Web3 wallet, integrating our API, or utilising any portion of the Services, you agree to be bound by these Terms, our Data Privacy Policy, our AML/CFT/CPF Policy, our Data Deletion Policy, and any API documentation or corridor-specific terms presented to you.

If you access or use the Services on behalf of a legal business entity, you represent and warrant that you have full legal authority to bind that entity to these Terms. In such cases, "you" and "your" refer collectively to both the individual user and the corporate entity.

2. Scope of Services and Operating Model

Moniemax Digital Technology Solutions Limited dba Coinmonie provides enterprise financial technology that enables eligible businesses and individuals to request conversions between supported stablecoins and fiat currencies, routing related payment flows and settlements through API integration or web dashboards.

- **No Stored-Value or Deposit Accounts:** Coinmonie is a transaction-processing platform. We do not provide stored-value accounts, accept fiat deposits, issue digital assets, pay interest, act as a bank, or permit users to maintain ongoing fiat or digital asset balances on the platform.
- **Transitional Routing:** Funds or stablecoins received in connection with a transaction request are processed solely to execute, settle, or refund that specific order.
- **Third-Party Service Partners:** Execution of transactions involves licensed commercial banks, liquidity providers, payment processors, custodial partners, and blockchain networks ("Service Partners"). References to "direct conversion" or "automated

settlement" describe user-interface routing efficiency and do not imply the absence of underlying banking or liquidity intermediaries.

- **No Fiduciary Duties:** Unless explicitly agreed in writing, Coinmonie does not act as your fiduciary, custodian, broker, or financial adviser. We do not guarantee stablecoin parity, reserve backings, or redemption capabilities of third-party stablecoin issuers.

3. Account Eligibility and Registration

To access or use the Services, you must meet the following baseline conditions:

- **Age & Authority:** Be at least 18 years old (for individuals) and possess full legal capacity to enter into binding contracts.
- **Accuracy of Information:** Provide complete, truthful, and updated identity, business, and transactional information during registration and onboarding.
- **Account Security:** Maintain strict confidentiality of account credentials, API keys, and multi-factor authentication (MFA) devices. You must notify compliance@coinmonie.com immediately upon discovering any unauthorised platform access.
- **No Shared Access:** You must act strictly for yourself or your registered entity. Duplicate accounts, nominee accounts, shared profiles, or proxy usage designed to obscure beneficial ownership are strictly prohibited.
- **Sanctions & Compliance Eligibility:** Neither you nor any associated legal owners, controllers, or transaction counterparties may be subject to economic sanctions, political designations, or regulatory enforcement actions that prohibit access under applicable laws.

4. Verification and Risk Control Infrastructure

Moniemax Digital Technology Solutions Limited dba Coinmonie operates robust Know Your Customer (KYC) and Know Your Business (KYB) procedures alongside continuous sanctions, PEP, fraud, and financial-crime monitoring.

- **Mandatory Verification:** Full identity verification (for individuals) or corporate beneficial ownership verification (for entities) is required prior to processing any transaction. Anonymous access and pseudonymous transactional routing are not permitted.
- **Verification Cooperation:** You agree to supply all requested identification, corporate incorporation documents, source-of-funds evidence, and transactional documentation promptly upon request, and authorise Coinmonie to verify such data via authorised third-party databases.
- **Right to Restrict:** Coinmonie reserves the right to decline, pause, apply specific volume caps to, or discontinue services for any account or transaction at its sole discretion based on legal requirements, risk assessment models, or partner restrictions.

5. Quotes, Orders, and Settlement Mechanics

5.1 Transaction Requests

You may initiate a conversion or settlement request via the platform or API by specifying the source asset, destination currency, network, payment rail, and beneficiary details.

5.2 Pricing, Fees, and Quotes

- **Transaction Fee:** Coinmonie charges a transaction fee on each processed order as displayed on the platform dashboard, API quote endpoint, or as separately agreed in writing in a custom institutional fee schedule.
- **Binding Quotes:** Prior to transaction confirmation, Coinmonie presents a binding conversion quote displaying the applicable execution rate, Coinmonie transaction fee, network gas/rail costs, and quote validity expiration time.
- **Prospective Rate Adjustments:** Coinmonie reserves the right to update its standard fee schedules and exchange rates prospectively. Once a quote is confirmed before expiration, it remains fixed except in cases of manifest technical pricing error, market disruption, or statutory regulatory intervention.

5.3 Order Confirmation and Execution

An order is considered accepted only when Coinmonie issues a formal transaction status confirmation. Automated API receipt acknowledgements do not constitute execution confirmation. You must transmit input assets strictly adhering to network specifications, timing windows, contract addresses, and memo tags provided in the confirmed order instructions.

5.4 Settlement Delays

Settlement timelines provided within platform interfaces are estimates. Final execution depends on underlying blockchain network confirmation speeds, banking settlement hours, liquidity pool availability, and automated compliance clearing protocols.

6. Stablecoin, Blockchain, and Technological Risks

By using the Services, you explicitly acknowledge and accept the operational risks inherent to virtual assets and blockchain infrastructure:

- **Peg and De-pegging Risk:** Supported stablecoins may experience liquidity drops, market volatility, loss of fiat peg, protocol freezes, or issuer insolvency. Coinmonie does not guarantee stablecoin liquidity or exchange-rate stability.
- **Blockchain Irreversibility:** Virtual asset transfers are non-reversible once broadcast to a blockchain network. Transmitting funds to incorrect addresses, unsupported networks, or unsupported smart contract layers may result in total loss of funds.
- **Unsupported Assets:** Sending unsupported tokens or attempting transactions on unapproved blockchain networks to Coinmonie settlement infrastructure may cause

permanent loss. Asset recovery is not guaranteed and, if technically feasible, incurs administrative recovery fees.

- **Regulatory & Legal Status:** Digital assets are not legal tender, and fiat conversion balances processed through the platform do not carry deposit insurance, bank protection, or statutory investor compensation funds.

7. Source of Funds, Title, and Refund Protocols

- **Authorised Funding:** You must fund transactions strictly from bank accounts or Web3 wallets lawfully registered in your name or the name of your verified business entity. Third-party funding without prior written compliance approval is prohibited.
- **Temporary Processing Hold:** Any fiat or digital assets received by Moniemax Digital Technology Solutions Limited dba Coinmonie are held solely for the time necessary to process, settle, reconcile, or refund the designated transaction.
- **Refund Execution:** If a transaction cannot be completed due to execution failure, processing errors, or technical invalidity, Coinmonie will exercise commercially reasonable efforts to initiate a refund to the original funding source within 48 hours following failure confirmation and completion of compliance reconciliation.
- **Refund Deductions:** Refunded amounts may be adjusted for third-party network gas fees or payment rail costs incurred during execution, except where transaction failure resulted directly from Coinmonie's gross negligence, breach of Terms, or internal system failure.

8. Fees, Rates, and Taxation

Coinmonie automatically calculates and deducts its fee alongside applicable network charges prior to final transaction settlement.

You remain solely responsible for identifying, collecting, reporting, and remitting any taxes, duties, levies, or assessments imposed by applicable tax authorities arising from your platform activities, conversions, or business settlements, excluding taxes assessed on Coinmonie's net income.

9. Acceptable Use and Prohibited Activities

You agree not to use the platform, dashboard, or APIs to execute or facilitate any of the following prohibited activities:

- **Illicit Financial Activity:** Money laundering, terrorist financing, proliferation financing, sanctions evasion, tax evasion, fraud, bribery, corruption, ransomware execution, or illegal gambling.
- **Obfuscation Tools:** Interacting with mixers, tumblers, privacy coins, or anonymous routing protocols designed to obscure transactional origin or ownership history.
- **Evasion & Structuring:** Splitting transaction amounts, maintaining multi-account setups, using fake identity markers, utilising proxy signers, or providing misleading business profiles.

- **System Abuse:** Transmitting malware, attempting unauthorised reverse-engineering of APIs, executing denial-of-service (DoS) attacks, probing system vulnerabilities, or scraping non-public platform parameters.
- **Unauthorised API Nesting:** Offering downstream, nested, or sub-licensed commercial conversion services to third parties via Coinmonie APIs without explicit prior written authorisation from Moniemax Digital Technology Solutions Limited dba Coinmonie.

10. Compliance Actions and Account Controls

Moniemax Digital Technology Solutions Limited dba Coinmonie and its Service Partners maintain active monitoring mechanisms to protect platform integrity. Coinmonie retains the absolute legal right to delay execution, pause pending transactions, freeze asset flows (where legally mandated), request supplementary compliance evidence, reverse fiat ledger errors, submit regulatory reports to the NFIU, or terminate platform access immediately if:

- Required by applicable law, court order, or regulatory directive;
- Suspicious, fraudulent, or sanctioned activity is flagged;
- You breach any material term of these Terms or associated policies; or
- Continued service provision presents unacceptable legal, technical, or operational exposure.

Coinmonie may be legally prohibited under statutory anti-tipping-off provisions from disclosing specific details regarding internal compliance investigations or reporting decisions.

11. API and Enterprise Business Customer Terms

- **API Credentials:** Institutional clients are issued unique API keys and documentation access. API keys are confidential, non-transferable, and must be secured under strict internal access protocols.
- **Integration Responsibility:** Business clients bear sole responsibility for technical API integration, user-interface disclosures, customer support execution, and data security maintenance on their client-facing applications.
- **Downstream KYC/KYB Obligation:** Where an API client operates as a regulated business onboarding end-users, the API client must execute compliant KYC/KYB screening, sanctions checking, and transaction monitoring, providing requested compliance metadata to Coinmonie immediately upon request.
- **Co-Branding Restrictions:** API clients shall not state, imply, or suggest that Moniemax Digital Technology Solutions Limited dba Coinmonie guarantees, licenses, sponsors, or underwrites their commercial enterprise or end-user operational model.

12. Intellectual Property Rights

Moniemax Digital Technology Solutions Limited dba Coinmonie and its licensors retain exclusive ownership of all proprietary rights, copyright, trademarks, software code, API architecture, database rights, documentation, and design assets associated with the Services.

Subject to full compliance with these Terms, Coinmonie grants you a limited, non-exclusive, non-transferable, non-sublicensable, revocable license to access and use the platform and APIs for their intended business or individual conversion purposes.

Any suggestions, ideas, enhancement requests, or platform feedback provided by you may be implemented by Coinmonie without obligation, royalty, or compensation.

13. Availability, Modifications, and Disclaimers

- **Service Availability:** Coinmonie strives to maintain platform availability but does not guarantee uninterrupted, continuous uptime. Services may be temporarily suspended for scheduled maintenance, system upgrades, emergency security patches, or third-party rail disruptions.
- **Asset Support:** Coinmonie reserves the right to modify supported stablecoin pairs, fiat payment corridors, API endpoints, or liquidity rails at any time upon prospective notice.
- **"As-Is" Provision:** To the maximum extent permitted by applicable law, the Services are provided on an "as-is" and "as-available" basis without express or implied warranties of merchantability, fitness for a particular purpose, non-infringement, or error-free execution.

14. Limitation of Liability

14.1 Exclusions

Nothing in these Terms limits or excludes liability for fraud, willful misconduct, gross negligence, intentional injury, or any statutory liability that cannot lawfully be limited under Nigerian law.

14.2 Foreseeable Direct Loss

Subject to Section 14.1, Coinmonie is liable only for reasonably foreseeable, direct losses caused by Coinmonie's gross negligence, material breach of these Terms, failure to execute confirmed transaction instructions, or system malfunctions directly under Coinmonie's control.

Coinmonie may satisfy its obligation by re-performing the affected transaction, restoring the user to the precise financial position occupied prior to the failure, or refunding lost principal.

14.3 Liability Cap

Coinmonie's obligation to restore user principal lost through its own gross negligence or system malfunction is uncapped. For all other indirect, non-principal direct claims, or operational disputes, Coinmonie's aggregate financial liability under any theory of contract, tort, or regulatory duty shall

be strictly limited to the total transaction fees paid by the User to Coinmonie during the twelve (12) month period immediately preceding the event giving rise to the claim.

14.4 Excluded Events

Coinmonie is not liable for losses resulting from user error, unauthorised credential usage, third-party wallet compromises, third-party bank closures, stablecoin de-pegging, underlying blockchain network outages, or independent acts of Service Partners after funds have properly left Coinmonie's infrastructure.

15. Business Client Indemnification

If you use the Services for commercial or enterprise purposes, you agree to defend, indemnify, and hold harmless Moniemax Digital Technology Solutions Limited dba Coinmonie, its affiliates, directors, officers, employees, and agents from and against third-party claims, legal liabilities, regulatory fines, damages, and reasonable legal costs arising out of:

- Your breach of these Terms, the Privacy Policy, or the AML/CFT/CPF Policy;
- Your unlawful platform usage, fraud, or intentional misrepresentation;
- Inaccurate or unauthorised transaction instructions submitted via your account or API credentials; or
- Disputes between you and your end-users or corporate clients.

16. Account Termination and Inactivity

- **Voluntary Closure:** You may request account closure at any time after settling pending transactions and paying outstanding fees.
- **Account Inactivity:** Accounts featuring no customer-initiated activity for twelve (12) consecutive months may be flagged as inactive. Coinmonie may restrict access to inactive profiles following notice, subject to statutory recordkeeping requirements.
- **Immediate Termination:** Coinmonie may suspend or terminate access immediately upon reasonable suspicion of policy breach, illicit activity, fraud, sanctions exposure, or court order.
- **Survival:** Provisions covering IP rights, compliance obligations, data retention, liability limitations, indemnities, and dispute resolution survive account termination.

17. Dispute Resolution, Governing Law, and Arbitration

17.1 Governing Law

These Terms and any non-contractual obligations arising out of or in connection with them shall be governed by and construed exclusively in accordance with the laws of the Federal Republic of Nigeria.

17.2 Mandatory Informal Resolution

Prior to initiating formal arbitration, both parties agree to attempt in good faith to resolve any dispute, claim, or controversy informally for a minimum of thirty (30) calendar days by escalating the issue in writing to compliance@coinmonie.com.

17.3 Binding Arbitration

Any dispute, controversy, or claim arising out of or relating to these Terms, including its formation, breach, validity, or termination, that remains unresolved following the 30-day informal negotiation period, shall be finally and exclusively settled by binding arbitration under the Arbitration and Mediation Act 2023 of Nigeria.

- **Seat of Arbitration:** Lagos, Nigeria.
- **Tribunal Composition:** One (1) independent arbitrator appointed in accordance with the Act.
- **Language:** English.
- **Award Finality:** The arbitral award shall be final, binding, and enforceable in any court of competent jurisdiction.

18. Formal Complaints Process

If you experience a service error or transactional issue, submit a formal notice promptly to compliance@coinmonie.com within 30 days of the transaction execution date.

The complaint must detail the user ID, transaction hash/reference, date, amount, and nature of the issue. Coinmonie investigates all escalated claims under established statutory resolution guidelines.

19. Electronic Communications and Updates

You consent to receive all contracts, policy disclosures, transaction notices, fee adjustments, rate updates, and regulatory statements electronically via email or platform dashboard notifications.

Coinmonie may update these Terms to reflect legal, product, or operational changes. Continued use of the platform following the publication of updated Terms constitutes full acceptance of the revised Terms.
